Safety instructions

Before commissioning the single disc machine, please read these instructions carefully and keep them handy at all times. The single disc machine should only be used by persons trained in its use and explicitly entrusted with its operation.

Warning

The single disc machine is not suitable for cleaning surfaces which release health hazardous dusts and liquids. Do not use the machine on steps.

Caution

Never drive the machine over electric cables. Danger of electric shocks!

General remarks

The operation of the single disc machine is subject to the currently valid national regulations. It is essential to observe not only the operating instructions and the binding regulations on accident prevention valid in the country in use, but also the generally acknowledged rules for safe and correct working procedures. No methods involving safety risks must be employed. The use of automatic machines on public paths and roads are prohibited.

Correct use

All single disc machines are intended only for use in building interiors. Any use beyond this is considered incorrect. The manufacturer accepts no liability for any resultant damage; the user alone bears the risk. Correct use also includes adherence to the operating, servicing and maintenance conditions recommended by the manufacture. The relevant accident prevention regulations as well as all the generally acknowledged service and working practices must be followed. Unauthorized modifications to the machine exclude the manufacturer's liability for resultant damage. Before machine use, floor coverings must be tested for suitability for this cleaning process. Pay attention to the area compression of point elastic floors, e.g. in gymnasiums. The manufacturer accepts no liability for damage to equipment and to the floor being cleaned from using the wrong brushes and cleaning agents.

Product liability

The operator's attention is drawn explicitly to the fact that the machine may only be used for their intended purpose. If the machines are not used for their intended purposes, the user must accept full responsibility. Any liability of the manufacturer is thus excluded.

Sources of risk

When the machine is stationary, the brush unit must be immediately switched off to prevent damage to the floor covering. During transportations in lifts, the currently valid user instructions and safety regulations – and particularly those concerning maximum loading – must be observed.

Machine operating position

The machine operating position is behind the machine.

Approved maintenance staff

The single disc machine may only be serviced and repaired by persons with technical and legal authorization.

Cleaning agents

When using cleaning agents, the manufacturer's danger warnings must be followed and protective goggles and clothing must be worn. Only use low foaming, non-combustible cleaning agents which do not contain generally health hazardous substances. Explicit reference is made to the risks of using highly flammable, combustible, toxic, health hazardous, corrosive or irritant substances.
