## Bona D510

D510 is a one-component primer for the preparation of substrates prior to the use of levelling compounds, in particular Bona H600, H610 or H620. It is suitable for absorbent or non absorbent substrates (with the exception of magnesium industrial floors) and for chipboard, panels and similar substrates.

## Key Benefits

- Certified as "very low emission" EC 1
- Solvent free
- Good adhesion to many substrates

## Technical Data

| Product type:        | Synthetic dispersion   |
|----------------------|--|
| Colour:              | White  |
| Viscosity:           | Easy to apply  |
| Density:             | 1.0 g/cm3  |
| GISCODE:             | D1   |
| Emicode:             | EC 1   |
| Cleaning agent:      | Water  |
| Storage / transport: | The temperature must not fall below<br>+5°C or exceed +25°C during stor-<br>age and transport. Store in a dry, well<br>ventilated place. |
| Shelf life:          | 12 months  |
| Pack size:           | 5 litre canisters ( 3 per carton )   |
